Communicative English & II Language Enhancement

Dear Parent,

As we are all aware of that consistently as a school and parents we were keen to improve the level of COMMUNICATION SKILL and provide extra mentoring for second language HINDI & TELUGU of our students across all grades, so to grab an opportunity right in the beginning of the academic year we have planned a structured pattern and strategies to improve Communicative English skills and Basic Language skills of our students.

This effort will be fruitful only when parent participation is accompanied with involvement of students and teachers. The evidence of student engagement in the class will be clearly visible on a day to day basis, but equally some home assignments will be given to them. So ensure to make your ward attempt those assignments meticulously for better improvement.

- Communicative English: Diffusing 8th period of time table till June 30th wherein it will be utilised to engage the students with activities and exercises of spoken English classes. This program aids in developing students communication skills by giving adequate exposure in speaking and listening skills and to reinforce the basics of grammar specially focusing on pronunciation and conversation.
- Language Enhancement: Basic reading and writing skill along with grammar concepts can be strengthened only with complete focus and lot of practice. So to put an extra effort for the same we will not begin the content of Language textbooks during March to June. Once we ensure that student is at a grade level standard in terms of reading and writing, after which the textbooks will be issued and taken over. In such scenario we may delete some chapters from the textbook, for which we expect your consent and support.

We believe that reinforcement of the above plan can happen when teacher-student and parent work hand in hand. The task done in school should be practiced well at home after which we can bring a measurable change in your wards communicative and second language skills.

We hope to have a good collaborative time.

Regards,

Surya the Global School
